

# The Ellison Institute Welcomes Viterbi Students

The Ellison Institute is passionate about education and inspiring the next generation of engineers to enter the health and science fields

## Student Research

Undergraduate and graduate positions available

Check myViterbi for a list of eligible Ellison/Viterbi faculty

Check [Ellison.usc.edu/research](http://Ellison.usc.edu/research) for project information

For questions, email Jill Infusino, Education & Outreach Specialist at  
[JInfusino@ellison.usc.edu](mailto:JInfusino@ellison.usc.edu)

## While at The Ellison Institute, students will:

- Be able to reach EI faculty and staff for advice, mentorship and skill development
- Work on patient-relevant studies and research (translational science)
- Creatively explore their interests

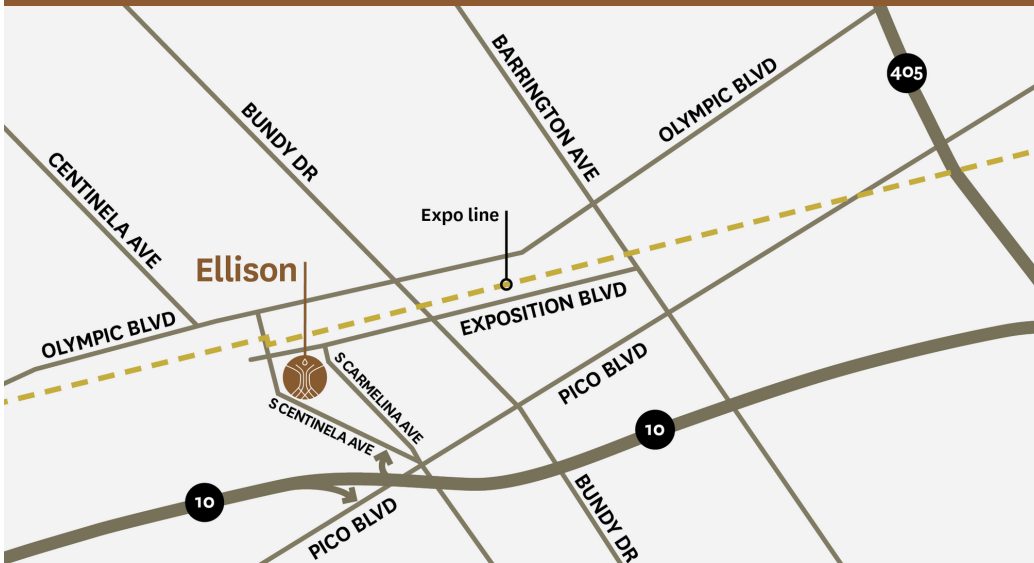

(l to r) Dr. Jerry Lee (Ellison Institute)  
Dr. Andrea Armani (Chem Eng)  
Ms. Kylie Trettner (Chem Eng/Ellison Institute)

(l to r) Dr. Emma Fong (Ellison Institute)  
Furkan Kurtoglu (Indiana University)  
Patrick Gelbach (USC)

- Work independently on projects
- Have access to a brand-new facility, featuring new labs and equipment
- Collaborate with other USC faculty
- Collaborate with outside organizations, including government agencies, pharma companies and other universities

We are currently offering remote opportunities, and we look forward to welcoming students back for future in-person positions - a quick trip on the Expo Line from campus

The Ellison Institute strives to spark innovation, leverage technology, and drive interdisciplinary, patient-centered research to continually reimagine and redefine cancer care, enhance health, and transform lives.

Lawrence J. Ellison Institute for  
Transformative Medicine of USC  
*Reimagining medicine, transforming lives.*
