

Come work for the Office of Clean Energy Demonstrations!

We seek candidates from across the country who are interested in building a diverse and high-performing team charged with scaling the emerging technologies needed to tackle our nation's most pressing climate challenges. The Office of Clean Energy Demonstrations (OCED) is managing more than \$25 billion in funding to deliver clean energy demonstration projects at scale in partnership with the private sector to accelerate deployment, market adoption, and the equitable transition to a decarbonized system. OCED is a multi-technology office with demonstrations that include clean hydrogen, carbon management, advanced nuclear reactors, long-duration energy storage, industrial decarbonization, as well as demonstration projects in rural or remote areas and on current and former mine land. Current openings include:

Project Management

The Office of Clean Energy Demonstrations is looking to hire several Project Managers with expertise in areas such as renewable systems, nuclear technologies, carbon capture and removal, and hydrogen.

Project Managers will advise and support DOE and OCED officials on project management activities. Specific duties may include:

- Supports development of project management processes and procedures
- Designs project proposals with defined goals and objectives
- Develops operating plans, schedules, and budgets for assigned project or program
- Directs and coordinates the execution of programs/projects through interaction with appropriate DOE organizations stakeholders, and supporting contractors
- Ensures early identification and mitigation of cost, schedule, and/or technology risks supporting on-site monitoring of projects
- Prepares reports on project progress

Project Managers may be eligible for telework or remote work and be required to travel.

Qualifications

Applicants from a broad range of backgrounds are encouraged to apply.

Desired qualifications include:

- Experience working on large, technologically-complex projects under tight deadlines and budgets
- Demonstrated capabilities in project management principles, particularly as applicable to energy-related projects
